North Horizon Partners.

Introductions that move business forward.

Build the relationships behind your next stage of growth.

We identify the companies and decision-makers worth engaging, and create the path to conversation.

> The right relationships change the trajectory of every business.
> We help create them systematically.

Table of Contents

One engine, any high-value B2B market.

CLIENT	SECTOR	OUTCOME
NOBLE Capital Markets	Investment banking / M&A	$2.6M-EBITDA mandate signed · 10+ introductions
RP Wealth Advisors	Wealth management	6 high-net-worth introductions in 46 days
Clean-Seas West Virginia	Industrial technology	6 commercial introductions in 120 days
Vention	Manufacturing automation	+$85K in under 60 days
Connect Group	AI talent / recruitment	+$105K in one quarter

Detailed case studies are available during diligence.

Who this is built for

B2B firms whose deals run six to seven figures; one additional opportunity per month pays for the engagement many times over:

- Investment banks, M&A advisories & capital-markets firms
- Consulting & professional-services firms
- Commercial insurance & financial services
- Industrial services, equipment & manufacturing
- Enterprise software & technology services
- Agencies with large recurring engagements

4+	$1B+	$10M+	8+

A RECENT MANDATE

Noble **Capital Markets**

INVESTMENT BANKING / M&A

Challenge

A FINRA-registered investment bank needed steady sell-side deal flow in the industrial segment without burning banker hours on prospecting.

Target: business owners open to a transaction. The hardest cold conversation in B2B.

Solution

The full Origination System: every account qualified before first touch, multi-channel outreach tested against real transaction comps, pipeline reviewed with the deal team bi-weekly.

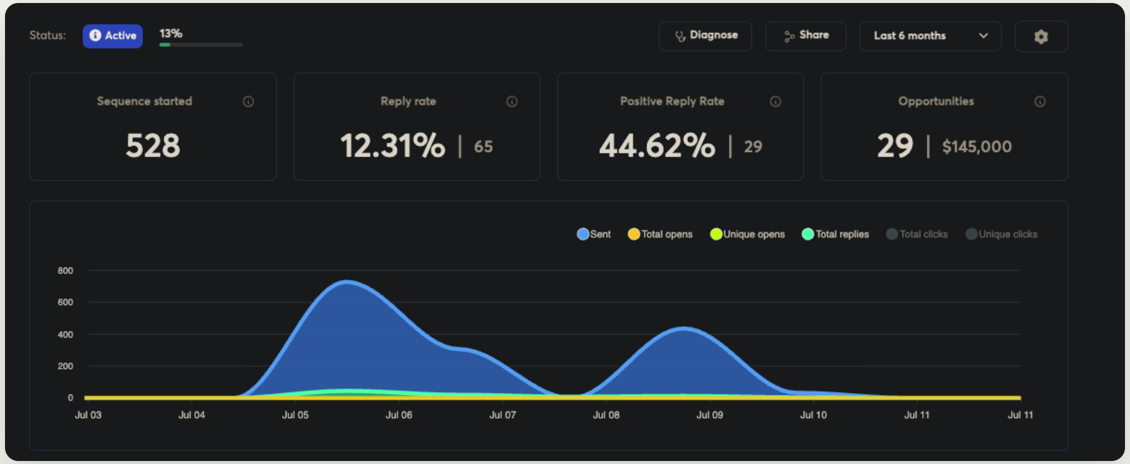
Results

- ✓ Sell-side mandate signed: $2.6M-EBITDA business
- ✓ 3+ opportunities in active pipeline
- ✓ 10+ introductions with qualified business owners
- ✓ 5+ owner relationships opened for the bankers

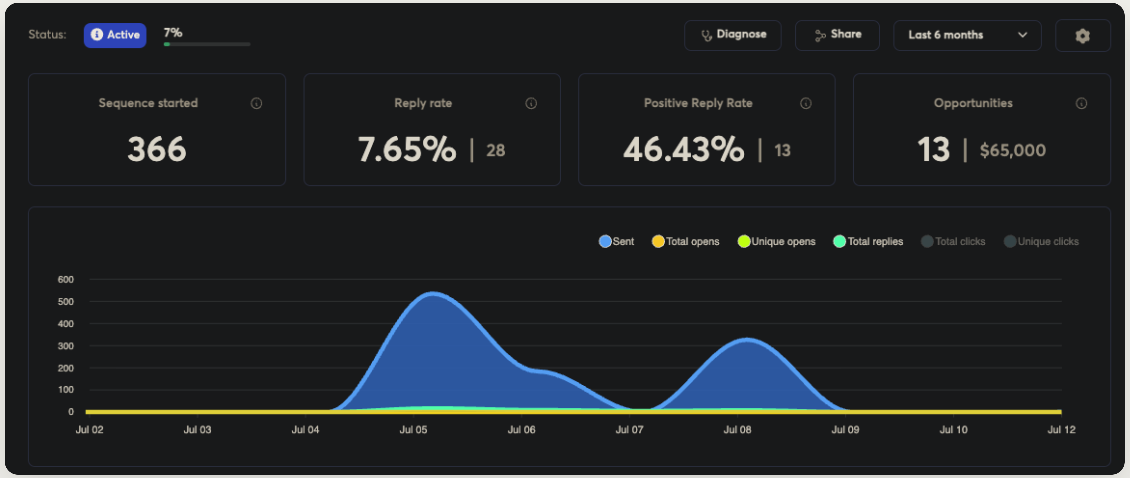
“They’ve been great at sourcing very targeted opportunities for us, both for sell side and for capital raises. We’ve suggested and they’ve delivered.”

THOMAS HILL · SENIOR MANAGING DIRECTOR, NOBLE CAPITAL MARKETS

The engine, live.



29 qualified opportunities ($145K) from 528 companies contacted · 44.6% of replies positive



13 qualified opportunities ($65K) from 366 companies contacted · 46.4% of replies positive

Screens taken directly from our sending platform: two live campaigns from the last six months. Every reply behind these numbers was read and qualified by a human before anything reached a calendar.

How does your firm win its next client?

For most high-value B2B firms, the honest answer is **"someone refers us."**

85%

The referral well is finite.

of professional-services revenue is word of mouth, but only 29% of willing clients ever refer, and no one controls when. That's not a pipeline. That's weather.

30–50% less

It's repricing your life's work

what relationship-dependent businesses sell for: 3–4x EBITDA instead of 7–8x. Referral dependence costs you twice: growth now, enterprise value at exit.

The usual ways out are closed.

70%+

"We'll get found"

of the buying journey happens before any vendor is contacted. If you wait to be discovered, you were never in the deal.

+38%

"We'll buy attention"

Meta cost per acquisition in one year; B2B search ~$802 per customer, LinkedIn ~$982. The auction only moves one direction.

8.5% → 3.4%

"We'll blast outbound"

cold-email replies collapsed as AI flooded every inbox. 36% of B2B firms cut SDR teams in 2025. Volume now buys spam folders.

Manufacture what referrals do naturally. Referred opportunities convert at 15–25%; cold lists at 1.5–2%. The difference is trust and fit established before the first conversation.

Our Origination System engineers exactly that.

NORTH HORIZON PARTNERS

Your senior people should be closing deals, not hunting for them.

We find your ideal buyers, qualify them, and introduce them onto your calendar: an origination asset that works for you, one that compounds.

OPPORTUNITIES, NOT LEADS

Qualified meetings with the decision-makers behind your largest deals. Introductions convert like referrals; the fit is established before you talk.

BUILT IN-HOUSE, END TO END

Research, enrichment, infrastructure, multi-channel outreach: our team, our systems. AI does the research; a human makes the introduction.

PROVEN WHERE THE BAR IS HIGHEST

Our engine booked business owners into sell-side M&A conversations for a FINRA-registered investment bank. If it books M&A meetings, it books your deals.

ALIGNED ON OUTCOMES

The retainer covers hard costs. Our profit is a share of what we close together.

OUR APPROACH · BUILD

A linear path from signature to qualified opportunities.

01 Deep ICP & Market Map WEEK 1

Define your ideal buyer (firmographics, deal triggers, disqualifiers) and build the full universe of matching companies.

Result: a complete map of your addressable market, 100,000–500,000 companies, before any outreach.

02 Qualification Before First Touch WEEKS 1–2

Every company runs through the Origination System and is classified: include / adjacent / exclude. Humans review the edge cases.

Result: outreach goes only to companies worth your time.

03 Infrastructure & Messaging WEEKS 2–4

Dedicated sending infrastructure (fully separate from your corporate email), plus messaging built from market evidence, not adjective soup.

Result: a launch-ready, multi-channel engine your market hasn't already deleted twice.

04

Launch & Systematic Testing

WEEKS 3–6

Live across email, phone, LinkedIn. Angles A/B-tested weekly: losers killed, winners scaled.

Result: first introductions typically within two weeks of warmup completing.

05

Qualified Meetings, Booked Direct

ONGOING

Responders are qualified against your criteria and called while interest is hot, then introduced onto your calendar with full context.

Result: a steady monthly rhythm of qualified opportunities, calibrated to your market.

06

Reporting & Compounding

ONGOING

Bi-weekly pipeline reviews; learnings feed back into targeting, so month four outperforms month one.

Result: full visibility, and an origination asset that compounds.

Signature → **market mapped** (wk 1) → **engine live** (wk 3) → **first qualified calls** (wk 4–6) → **compounding pipeline** (Q1 onward)

THE ORIGINATION SYSTEM

Everyone's using AI to send more. We use AI to decide **who deserves a conversation.**

01
Discover
Build the full universe of companies that fit: multiple sources, not one tool's stale export.

02
Enrich
Firmographics, trigger events, transaction comps. Real numbers on every account.

03
Map
Find the decision-makers: who owns the problem, who signs.

04
Assess
AI-scored against your ICP before first touch. The reject pile never hears from us.

05
Nurture
Multi-channel sequences on concrete triggers, tested head-to-head weekly.

06
Deliver
Responders qualified by a human, called while interest is live, booked with full context.

	Generic lead-gen agency	AI SDR software	North Horizon
Where AI sits	Writing more emails	Writing ALL the emails	Research & qualification, before any send
Who gets contacted	Whoever's on the list	Whoever the tool scraped	Only genuine fits
Who handles a reply	A junior VA, eventually	A bot	A human, fast, with context
Typical outcome	~3.4% replies, burned domains	50–70% churn within a year	Referral-grade meetings
Their incentive	Meetings held	Seats sold	Revenue closed

The team.

Nikhil (Nick) Nischal

MANAGING PARTNER

Four years building origination engines for high-value B2B firms, from wealth managers to a FINRA-registered investment bank. Leads strategy on every engagement.

Saad Belcaid

PARTNER, MARKET STRATEGY

Wealth management and high-net-worth markets. Built and scaled B2B demand systems into seven-figure revenue.

Shiv Shankar Prasad

CHIEF OPERATING OFFICER

Runs delivery across every engagement: infrastructure, data quality, and the operating cadence behind the system.

ENGAGEMENT STRUCTURE

Aligned on Outcomes

Our upside sits where yours does: in closed revenue. The build-out and monthly components cover hard costs; our profit comes from performance.

COMPONENT	WHAT IT COVERS	BASIS
Build-Out (one-time)	Market map, ICP engineering, system configuration, infrastructure, messaging	**$10K–$35K**, scoped to market size & complexity
Monthly Operations	Data, infrastructure, sending & calling capacity, qualification team, reporting	**$8K–$15K/mo** (hard costs, held lean)
Performance Fee	Our actual compensation	**5–15%** of closed revenue, scaled to your deal size

01

Performance-weighted.

The economics tilt to the success fee: a partnership, not a retainer business.

02

No junk-meeting incentive.

We're paid on closed revenue; a bad meeting costs us too.

03

Direct senior involvement.

You work with the people who ran deal origination for an investment bank.

04

Your pipeline, your data.

Tracker, statuses, and learnings visible to you, always.

Final scope depends on market size, deal complexity, and channel mix; exact numbers in your proposal after our first conversation.

WORKING TOGETHER

What an engagement looks like.

What we need from you

- 90 minutes with whoever owns revenue conversations: ICP, deal triggers, objections
- Calendar availability & qualification criteria
- Feedback loop on early conversations (first month)
- Someone to take the meetings: we generate demand; you run the relationships

What you get

- Dedicated demand generation team & senior oversight
- Full market map of your ideal buyers
- Every account qualified before any outreach
- Multi-channel outreach on dedicated infrastructure
- Human-qualified meetings, direct to calendar, with context

The next step is a 30-minute conversation. We'll map your market, pressure-test the fit, and show you the exact pipeline we'd build. If the fit isn't there, we'll tell you.

Six months from now, the difference isn't just revenue. It's an origination engine you own: the asset buyers pay a premium for.

Great business relationships start with a conversation.

Let's have one.
